11 December 2020

Dear [REDACTED]

I am fine, how are you my Sponsors?

Now we are living in bad situation where the world is held by the <sup>virus</sup> sick of Corona. In this case, everything is now changed all over the world.

We opened schools on the 23 November and we took about 8 months at home. When I was at home, I was living under the rules of World Health Organisation where it stated that we should leave space of one metre between other peoples, we should wash our hands for 20 seconds after every touching everything and we should wear our masks when we meet with other people.

Wherever, even there at school we still wear our masks, wash our hands, uses sanitizers and so all. Even when we are at the assembly, we still leave space of 1 metre between.

Since when schools closed, I was still on my studies until schools reopen. Even now I still working hard. I have bought a book of Understand and Communicate so that I should improve my knowledge in English language. Every topics that we are doing here in Grade seven are there in that book.

Here in Lesotho, there are more than three thousand cases of people who got spread by Corona Virus but in my family there is no case recorded. I wish God to protect you and your families so that I should have a chance of going to school.

When we arrived school, we started every subject at the beginning because of people who learn slow. This going to help us as students because even where we were not understanding now we are going to repeat everything afresh.

I hope you are still protected, against this Corona virus, did you?

With Love
